

Parent comments on *The Mountain You Have Climbed: A Parent's Guide to Childhood Cancer*

Very great job. - Lewis Family

It is excellent and will help anyone just coming in and getting started on cancer treatment. - Ketler Family

The material was very well worded and easy to comprehend. There's not too much for a person to feel overwhelmed. Especially the information on schools - when your child is not able to attend school you pretty much feel lost on where to begin. This lets you know first hand so that when you contact the school you know exactly what information they need in order to help your child.- Goodwin Family

Excellent...Families will appreciate this material...I read it over and over again and learn something new each time. - Coggins Family

Excellent! I only wish I had it 5 and a half years ago. I've learned most of this information over the years, but what a blessing it will be to newly diagnosed parents. To have a reference guide to always refer to will help with a lot of anxiety. Again I salute you for your outstanding work and generosity. - Taylor Family

Thank you for putting this together. I found it very informative and will save it. - Shank family

Wonderful! Wish I had this two and a half years ago. - Hanson family

Awesome packet-wish I would have had it when she was first diagnosed. - Barger family

Excellent! I've been living with childhood cancer for over 15 years experiencing relapse and eventually a bone marrow transplant for leukemia. I still got new information from this booklet. This packet would have been a tool to hold onto over the years if I received it when Matt first got sick. It's perfect for parents to have when their child is newly diagnosed or for parents who have been living with cancer for many years. - Fingarson Family

"You & Your Spouse or Partner" was a very good section. Talking about intimacy problems can be very touchy. This was up front and open, I liked that. A+. At the end of Dealing with Loss, reading how to let go, but still hang on brought tears to my eyes because it was so true. It was written very well, as if it was pulled right out of my head. Overall, this is a wonderful book of information. I wish I had this book to read through when Kenton was first diagnosed. It would have helped tremendously. It answers a lot of questions that I had. A++++. - Haygood Family

I found this information to be interesting and informative...Something that would have been helpful at the time of my daughter's diagnosis. - Armata Family

Although the packet included a lot of material, I feel it was all vital and extremely informative. Going through such a devastating illness with your child is hard enough. It is in a way comforting to have a guideline or step by step information to review and actually put to use. – DiDonna Family

Very good. It's helpful to read the comments from other parents and know you are not alone, especially in the beginning when you feel like no one else understands what you are facing. - Escoe family

This guide was very life like. The quality and information were excellent. - Buldini family

Very thorough. - Edl family

It is definitely a 10/10. Would love to have had this information when my child was first diagnosed. - Braun family

Excellent. Very helpful information. - Kolker family

This is a very good source of information to pass along to families whose children have cancer. We wish we had this when Thomas was going through treatment. It would have been a very good source of help. - Miller family

This information, even though we are in remission and only have 6 month check-ups, was extremely insightful and even made me aware of some things that never even crossed my mind. – Radtke family

On a scale of one to ten, I give this material a ten. For new parents and children, this material will make everything better and more understandable. I think the material is perfect. - Rucker Family

Excellent. Very well thought out. - Leinas Family

The content is direct and to the point. Scale of 1-10- a 10. Great job. - Hickman family

Everything was wonderful and very well explained. –Watkins Family

Excellent! Thank you! Your document is very useful and very complete. - the Dawes family

Thanks for providing such important information to patients and families.-Nancy Barbach ACSW, BCD- Schneider Children's Hospital

I think this is a great guide for parents. This is such a great handout. - Jeri Gates, LMSW-Texas Children's Hospital

This is an excellent document .- Joanne Kurtzberg, MD-Duke Medical Center

This will be a very valuable resource for our families. - Karen McKinley, PsyD., LISW-Children's Hospital of The Kings Daughters

I think this is a wonderful piece of work. It is comprehensive and thorough presented in a sensitive manner. - Shelley Beason- CSW, Duke University Medical Center

I was very impressed and very appreciative of the work that went unto the different sections. Almost every time I had a thought, it was covered. The sections were well written. It helped validate what I know and helped with new thoughts in regards to helping families navigate through this challenging time in their lives. –Tim Wright-Children's Hospital Central California
